

Information about Cookies on webpages related to Customer Account

On webpages associated with the Customer's Account, i.e. in the domain {pagename}.clickmeeting.com (profile page, waiting room, registration room, etc.) ClickMeeting uses the following technologies:

Cookie	Provider	Domain	Type	Expiration	Purpose	Category
CLICKMEETING_session	ClickMeeting	.clickmeeting.com	First party	Session	This cookie stores information on the session of the browser which the visitor uses when browsing the website.	Necessary
lang	ClickMeeting	.clickmeeting.com	First party	6 Month	This cookie stores information on the language of the browser that the visitor selected when he/she browses the website.	Preference
showOldBrowserModal	ClickMeeting	{pagename}.clickmeeting.com	First party	Session	This cookie stores information that the browser used by the visitor when visiting the website is incompatible.	Preference

When using certain features, ClickMeeting may also use other technologies on webpages associated with the Customer's Account. For example, when using the "Remember me" feature or the Attendee Space to register and log in to webinars, the login data of webinar participants is stored in Local Storage - a data store that saves this data on the system / browser. This data is stored until it is deleted by the attendee.

In addition, there may be placed third party elements in connection with the use of certain application functions by the Customer. This may include for instance social media plugins enabling the Customer to publish information on the social media account or present content from those social media sites. The published elements of such social media sites enable their providers to save and read information from Cookies related to domain names of those providers. The table below contains information about service providers (third parties) whose elements may be placed on pages in domains associated with the Customer's Account that is made available by ClickMeeting in connection with rendering the Service.
